PIZZE (We also have gluten-free pizzas.)

We bake our pizza after many hours of fermenting, resting and rising, a process that starts 48 hours before your first bite, time is the real ingredient in this phase. Our dough is the result of continuous research, a never-ending journey that begins with grains.

We like to take care of every detail of your pizza, without compromise, because every pizza we carefully bake in our yellow dome has a story to tell and we want you to peruse it. Our ingredients are fresh and we try to bridge the gap between southern Italy and our home here in the Netherlands. We believe in local producers and also like the rarity of certain products that you can only find on a crispy base. That's how we make it!
